

A Little History

A Historic Moment

On Nov. 18, 2008, about 150 people, including the Board of Trustees, district and campus leaders, and teachers and students gathered at the old Hollibrook Elementary campus for a groundbreaking ceremony. This afternoon event ushered in a new era in SBISD history. Hollibrook Elementary was the first school to begin new construction.

A Community's Support

At the new school groundbreaking, Superintendent Duncan Klusmann, Ed.D., recognized the new chapter in SBISD history represented by the community event at Hollibrook.

"After almost 12 years, we're breaking ground on a new school in Spring Branch," he told an outdoor gathering. "I would not have dreamed four or five years ago of transforming our system by replacing 12 of our old elementary schools, or of doing renovations on all of our school campuses."

Hollibrook Elementary Principal Elsa Delgado spoke emotionally about a brighter future.

"As we hold tight to traditions, we are committed to providing the best education for this community. We look forward now to new and improved facilities, which will help prepare our students for success in the 21st century," she said.

About the New Hollibrook Elementary

The district’s first school groundbreaking involving the 2007 Bond Plan was held for the new Hollibrook Elementary. This modern building design spans 105,000 square feet and can accommodate up to 800 students and teachers. The new Hollibrook Elementary replaces a 50-year-old building.

A New State-of-the-Art Building

The new building was designed by SHW Group Architects. The school is designed for students in prekindergarten through fifth-grade.

There are 41 regular classrooms, including two music rooms, two resource rooms, and an art and a science room. A large, modern library functions as a campus hub for student learning ranging from traditional books to digital technologies.

Address: 3602 Hollister
Principal: Elsa Delgado
Construction Team: SHW Group Architects, Gamma Construction
Completion: August 2010
Capacity: 800 students
Size: 105,000 square feet

Design Concept

There are 41 regular classrooms, as well as separate art, science, music and resource rooms. Every classroom has windows and views to the outdoors.

The courtyards adjacent to each classroom pod are secured with fencing. A tree well in one courtyard can act as a small, outdoor amphitheater for learning.

Site Plan

The new building is located directly to the east of the former school and is located at 3602 Hollister. The new school was erected directly behind the old building. The old school was demolished to make space for a campus and community “park” setting with soccer field, walking track and playgrounds.

Established shade trees were preserved in the design. A separate playground for prekindergarten and kindergarten students was also built.

Classroom Plan

The classrooms are arranged into three pods with two grade levels per pod (kindergarten and first-grade; second- and third-grade; fourth- and fifth-grade). Each of the pods has its own color to help with traffic flow and can be accessed from the main corridor.

The library is centrally located on the main corridor, and the cafeteria and administration areas stand nearby.
